In general, the Aruba 600 Series represents a superset from a functional and performance perspective.

We currently expect to be accepting final orders through January 1, 2010, however this final date will depend on the continued availability of stock and, at Aruba's discretion, the actual end of sale date may be earlier than January 1, 2010. End of support for the product is January 1, 2015. We strongly encourage you to transition all backlog and new business to the Aruba 600 Series as the recommended solution.
