In general, the Aruba 3400 represents a superset from a functional and performance perspective with the exception of the 24 10/100BASE-T PoE ports.

We currently expect to be accepting final orders through February 1, 2011, however this final date will depend on the continued availability of stock and, at Aruba's discretion, the actual end of sale date may be earlier than February 1, 2011. End of support for the product is February 1, 2016. We strongly encourage you to transition all backlog and new business to the Aruba 3400 as the recommended solution.
