In general, the Aruba M3 represents a superset from a functional and performance perspective.

We currently expect to be accepting final orders through November 1, 2010, however this final date will depend on the continued availability of stock and, at Aruba's discretion, the actual end of sale date may be earlier than November 1, 2010. End of support for the product is November 1, 2015. We strongly encourage you to transition all backlog and new business to the Aruba M3 as the recommended solution.
