In general, the Aruba 3200 represents a superset from a functional and performance perspective, with the exception of the number PoE ports on the 800 platform.

We currently expect to be accepting final orders through February 1, 2011, however this final date will depend on the continued availability of stock and, at Aruba's discretion, the actual end of sale date may be earlier than February 1, 2011. End of support for the product is February 1, 2016. We strongly encourage you to transition all backlog and new business to the Aruba M3 as the recommended solution.
