

## DATA SHEET

# ARUBA INDOOR MIMO 2.4-2.5 GHZ AND 4.9-5.9 GHZ CEILING MOUNT ANTENNA

JW001A

AP-ANT-13B antenna offers characteristics that are only normally seen in much larger antennas, offering "no compromise" coverage ideally suited for high-density AP deployments. The AP-ANT-13B antenna features a discrete, small package that easily blends into the office environment and its well-defined coverage area ensures excellent system-wide in-building performance in high-density, high-capacity environments. Ideal for conference rooms, dense cubicle deployments.

The AP-ANT-13B is available as a single antenna or a multipack three antenna kit, the AP-ANT-13B-KIT. An array of three AP-ANT-13Bs can be used with a single AP-124 to provide full dual-band 802.11a/b/g/n MIMO coverage, or the AP-ANT-13B single antenna can be used individually or in combination to provide diversity/non-diversity coverage with legacy 802.11a/b/g access points.
