

WEBINAR

Aruba AOS10 Essentials

Meet Aruba's new operating system

WEBINAR SERIES OVERVIEW

The Aruba AOS10 Essentials webinar series presented by Aruba Education Services will teach you about the latest Aruba wireless operating system architecture. Discover how AOS10 interacts with Aruba Central to scale, secure, and optimize modern networking solutions. You will learn the difference between previous technologies (Aruba Instant and Aruba OS8) and AOS10. Once you know that, you will be on your way to understanding new forwarding modes supported in AOS10 including mixed mode. We encourage attending both parts of this webinar series, as content will build on the previous session. Earn a certificate of completion for attendance & completion of the webinar evaluation. Replays will be available on the [Airheads Learning Community](#).

Recommended Background: This webinar is ideal for networking professionals who have experience with Aruba Central, Aruba Instant, or Aruba Gateways and Controllers running on AOS8. We recommend having an [ACMA](#) or [ACMP](#) certification, or an equivalent level of knowledge and experience.

DATES & REGISTRATION

PART 1: September 6, 2022 | 9-11AM PST

PART 2: September 13, 2022 | 9-11AM PST
